About

As a computer science undergraduate at REVA University, I have always been deeply fascinated by how software systems work under the hood. For me, programming is not just about writing code; it is about breaking down complex problems and building efficient, scalable solutions from the ground up.

My academic journey and hands-on projects have allowed me to build a strong foundation across multiple domains. Whether I am implementing system logic and data structures in C, building data processing and machine learning pipelines in Python, or managing structured data with MySQL, I enjoy the entire lifecycle of software development. I actively seek out opportunities to translate theoretical concepts into practical applications—ranging from simulation projects to virtual internships that mimic real-world engineering challenges.

I am driven by a continuous desire to learn, build, and optimize. As I look toward the future, I am eager to secure a challenging position in the software field where I can collaborate with talented teams, contribute to impactful products, and grow as a software engineer.

REVA University

B.Tech, CSIT (Computer science and information Technology)

Sep 2025 – Dec 2029

Currently Pursuing B.Tech in Computer Science and Information Technology at REVA University. Focused on core computing principles.

Kendriya Vidyalaya (KV)

High School Diploma, Science (PCMB)

Apr 2016 – Apr 2025

Completed my schooling from Class 3rd to Class 12th at Kendriya Vidyalaya RWF Yelahanka. . The KV system is recognized for its standardized, high-quality education across India, fostering strong academic discipline, adaptability, and an all-India perspective.
